

# Premier Complete B

Premier Liver, Energy, Brain, & Mood Support\*

Experience the revitalizing power of Premier Complete B, delivering a comprehensive blend of 9 essential B vitamin forms for maximum absorption. Formulated with carefully fermented ingredients, this fully activated B-complex supports vital functions throughout your body, from converting food into energy to promoting the production of mood-stabilizing neurotransmitters.\*

Crucial for the formation of red blood cells and the maintenance of liver health, Premier Complete B also acts as a potent antioxidant, shielding cells from harmful free radicals.\* Moreover, B vitamins play a key role in supporting the adrenal glands, which are responsible for managing stress responses.

Because B vitamins are water-soluble and not stored in the body, daily replenishment is necessary. While obtaining these nutrients through diet is possible, it can be challenging to ensure consistent, healthy dietary choices as well as adequate intake of a wide range of B vitamin-rich foods. Premier Complete B provides a comprehensive solution, delivering the full spectrum of B vitamins in readily usable forms for optimal health and vitality.

Premier Complete B contains the preferred, fully activated and bioavailable forms of B vitamins so that your body can begin using them right away. And, like all our products, we carefully source and manufacture this formula to deliver the Premier Quality that Premier Research Labs is known for and committed to.
